To better address & achieve conservation & environmental goals  
Ag policy should target landowners with incentives to  
provide wildlife habitat & environmental buffer zones. The  
incentive now is to farm or lease as much land as  
possible (production). There is little incentive to provide  
strategic wildlife cover. Incent people to leave parts  
of their farms for habitat. Utilize "conditions" to  
leave buffer zones, i.e. these <sup>buffer zones</sup> ~~areas~~ & habitat  
are required to participate in govt programs.
